

AI Integrated

# Eye Tokens

Welcome to the world of AI

# About us

## We Make Your Business Smarter with Artificial Intelligence

The intersection of crypto currency and AI presents various opportunities and challenges. While it offers innovative solutions to long-standing problems, it also raises concerns related to security, regulation, and ethical considerations. As both fields continue to evolve, it's likely that we'll see more developments at the intersection of crypto currency and AI.

We offers innovative solutions to long-standing problems, it also raises concerns related to security, regulation, and ethical considerations.

# Crypto Currency

Crypto currency is a type of digital or virtual currency that uses cryptography for security and operates on decentralized networks based on blockchain technology. Unlike traditional currencies issued by governments (fiat currencies), cryptocurrencies are typically not controlled by any central authority, such as a government or financial institution.

**Blockchain Technology:** Most cryptocurrencies operate on a technology called blockchain, which is a distributed ledger that records all transactions across a network of computers. This technology ensures transparency, security, and decentralization.

**Decentralization:** Cryptocurrencies operate on a decentralized network of computers, meaning there is no single point of control or authority. This decentralization is often seen as a key feature, as it reduces the risk of censorship and interference.

EYE TOKEN

# Crypto Currency

**Cryptography:** Cryptocurrencies use cryptographic techniques to secure transactions and control the creation of new units. Public and private keys are used to facilitate secure transactions between parties

**Mining:** Some cryptocurrencies use a process called mining, where powerful computers solve complex mathematical problems to validate transactions on the network and, in the case of proof-of-work systems, to add new blocks to the blockchain.

**Bitcoin:** Bitcoin, created in 2009 by an unknown person or group using the pseudonym Satoshi Nakamoto, was the first cryptocurrency. It remains the most well-known and valuable cryptocurrency by market capitalization.

**Wallets:** Cryptocurrency wallets are digital tools that allow users to store and manage their cryptocurrencies. Wallets can be software-based (online, desktop, or mobile) or hardware-based (physical devices).

# BSC (Binance Smart Chain)

The acronym "BEP" is often associated with the Binance Smart Chain (BSC), which is a blockchain network that runs parallel to Binance Chain. Binance Smart Chain introduced the BEP-20 token standard.

BEP-20 is a token standard on Binance Smart Chain, similar to Ethereum's ERC-20 standard. It defines a set of rules that a token must follow to be accepted on the Binance Smart Chain. BEP-20 tokens can be easily created and exchanged on the Binance Smart Chain, and they are commonly used for various decentralized applications (DApps) and projects within the Binance ecosystem.

**EYE TOKEN**

# Why BSC

## Transaction Speed and Cost:

**BEP-20 (Binance Smart Chain):** Binance Smart Chain is known for its faster block times and lower transaction fees compared to Ethereum. This can be advantageous for projects that require quick and cost-effective transactions.

## Security:

**BEP-20 (Binance Smart Chain):** The security implications of the DPoS consensus mechanism are a topic of discussion within the crypto community. Some argue that it might introduce a higher level of centralization and potential vulnerabilities.

## Decentralization:

**BEP-20 (Binance Smart Chain):** Binance Smart Chain operates with a delegated proof-of-stake (DPoS) consensus mechanism, which involves a set of validators chosen by the network. Some argue that this mechanism introduces a level of centralization compared to Ethereum's proof-of-stake (PoS) and future Ethereum 2.0 plans.

# We are ahead

## 01 AI in Crypto Trading

AI-driven trading bots can adapt to changing market conditions and make decisions based on complex algorithms.

## 03 Block chain and Smart Contracts

Blockchain uses decentralized and distributed ledger technology to record transactions securely.

## 02 Decentralized AI Platforms

There are projects exploring the combination of decentralized technologies (like blockchain) with AI.

## 04 Tokenization of AI Services

Cryptocurrencies and tokens can be used to facilitate transactions and payments for AI services.

# Artificial Intelligence

Our Cryptocurrency uses AI to generate bots to get most out of the industry.

EYE TOKEN

# We are ahead

## 01 AI in Algorithmic Trading Bots

AI-driven trading bots use sophisticated algorithms to analyze market data, identify trends, and execute trades automatically.

## 02 Decentralized AI Marketplaces

Some projects are developing decentralized AI marketplaces where individuals can buy and sell AI services using crypto currencies.

EYE TOKEN

# We are ahead

## 01 Sentiment Analysis

Sentiment analysis tools use natural language processing (NLP) algorithms to analyze social media, news articles, and other textual data to gauge the sentiment surrounding a particular crypto currency.

## 02 Predictive Analytics for Forecasting

EAI is used to analyze historical price data and other relevant market indicators to make predictions about future price movements.

# Our Plan

01

## Staking Investment

Your investment will give you a regular return

03

## ROI on ROI

other than direct income you will get the ROI on ROI by your associates.

02

## Direct Income

You will earn extra by referring more associates.

04

## Rewards

You will be rewarded for your business added to the company.

EYE TOKEN

# 01

# Staking Investment

You will get high returns on your investments based as per the below illustration

Investment	Return	Period
\$99, \$222, \$555	8%	20 Months
\$1111, \$2222, \$3333	9%	20 Months
\$4444, \$5555, \$11111	10%	20 Months

# 02

## Direct Income

You will earn for every investment made by you direct Associates.  
Total 10 Level will be given as per the table

Levels	Return
1	7%
2	3%
3	2%
4	1%
5-10	0.75%

# 03

## ROI on ROI

You will also earn ROI on the ROI received by Direct Associate upto 25 Levels

Levels	Return
1	10%
2	7%
3	5%
4	3%
5-7	2%
8-15	1%
16-25	0.75%

# 04 Reward

Your direct associates business will be converted into 3 legs and based on that reward is calculated

EYE TOKEN

# Terms and Conditions

- Admin charges of 10% is applied on closing.
- Closing monthly.

**EYE TOKEN**

# Thanks!
